Feel free to use my code to fix in your project. (sorry if i confused some thing for jason in your script)
A: I've posted a fixed version of your script. I fixed the way you're getting the SerialNumber from the Worksheet. I added an error checking if a serial number is found (:ERROR: Table'myTable' already exists.) I added some code to make sure the Table is Deleted properly
Script: Option Explicit Public Sub PopulateDatabase() Dim sh As Worksheet Dim ws As Worksheet

```
Dim serialNumber As String On Error
Resume Next Set sh =
ActiveWorkbook.Sheets("Sheet2")
Set ws =
ActiveWorkbook.Sheets("Sheet1")
serialNumber = "Serial Number" Set
Range = Sheets(serialNumber).Range
(serialNumber) Range.Delete End
Sub It should be a really good start
for you to have a look at the VBA
Debug Window. And if you have any
other questions, please comment
out the row where you're showing
the Debug window, and put it back
to where you left it. Screenshot: Q:

Wrap multiple element in a box I have an element inside a DIV. I need to wrap the content inside the DIV with div elements as a whole and

create a vertical margin of 1px. The parent element is hidden and should not have the height attribute set.

The image must be inside the container. All are wrapped by tags, except for the image. I'm not looking to make a photo carousel. HTML Overview Lorem ipsum dolor sit amet, consectetur
